they are highly experienced and trained in developing exam material, We 1Z0-1032-20 Free Exam Questions treasure and value everyone's opinion of you and this is the secret that make us the best among the market with great reputation these years.

NEW QUESTION: 1

You support a stateless web-based API that is deployed on a single Compute Engine instance in the europe-west2-a zone . The Service Level Indicator (SLI) for service availability is below the specified Service Level Objective (SLO). A postmortem has revealed that requests to the API regularly time out. The time outs are due to the API having a high number of requests and running out memory. You want to improve service availability. What should you do?

A. Set up additional service instances in other zones and load balance the traffic between all instances.

- B. Move the service to higher-specification compute instances with more memory.
 - C. Change the specified SLO to match the measured SLI.
 - D. Set up additional service instances in other zones and use them as a failover in case the primary instance is unavailable.
- Answer: A**
