Money Back Guarantee of CDMS-SMM4.0 Exam Study Guide.

NEW QUESTION: 1

- A. Option A
- B. Option B
- C. Option D
- D. Option C

Answer: D

Explanation:

Explanation

The AWS Documentation mentions the below

Real-time metrics and reporting

You can use data collected into Kinesis Streams for simple data analysis and reporting in real time. For example, your data-processing application can work on metrics and reporting for system and application logs as the data is streaming in, rather than wait to receive batches of data.

Real-time data analytics

This combines the power of parallel processing with the value of real-time data. For example, process website clickstreams in real time, and then analyze site usability engagement using multiple different Kinesis Streams applications running in parallel.

Amazon Glacier is meant for Archival purposes and should not be used for storing the logs for real time processing.

For more information on Amazon Kinesis, please refer to the below link:

*

NEW QUESTION: 2

A large enterprise introduced a next generation firewall appliance into the Internet facing DMZ. All Internet traffic passes through this appliance. Four hours after implementation the network engineering team discovered that traffic through the DMZ now has un-acceptable latency, and is recommending that the new firewall be taken offline. At what point in the implementation process should this problem have been discovered?

- A. When testing the appliance
- B. When writing the RFP for the purchase process
- C. During the product selection phase
- D. During the network traffic analysis phase

Answer: A

NEW QUESTION: 3

Your company has recently extended its datacenter into a VPC on AWS to add burst computing capacity as needed. Members of your Network Operations Center need to be able to go to the AWS Management Console and administer Amazon EC2 instances as necessary. You don't want to create new IAM users for each NOC member and make those users sign in again to the AWS Management Console.

How can you enable NOC members to access the AWS Management Console from within the VPC?

- A. NOC members can use their existing IAM users to access the AWS Management Console from within the VPC.
- B. Use your on-premises SAML2.0-compliant identity provider (IDP) to retrieve temporary security credentials to enable NOC

members to access the AWS Management Console from within the VPC.

members to sign in to the AWS Management Console.

- C. Use SAML 2.0 to retrieve temporary AWS security credentials to enable your NOC members to sign in to the AWS Management Console.
- D. Use OAuth 2.0 to retrieve temporary AWS security credentials to enable your NOC members to sign in to the AWS Management Console.

Answer: B
