- C. Frequency 0, 1, 5, 6; Duration 0, 1, 60, 61
- D. Frequency 1, 5; Duration 1, 60

Answer: B

NEW QUESTION: 4

You administer a SharePoint hybrid cloud deployment. System Center 2012 and Operations Manager with System Center Management Pack for SharePoint 2013 are installed.

You need to monitor the general health of the SharePoint environment by using Operations Manager with System Center Management Pack for SharePoint 2013.

Which task can you complete by using Operations Manager?

- A. Debug HTTP or HTTPS traffic between your computer and the Internet.
- B. Monitor Performance and issue alerts to users when SharePoint performance is at risk in SharePoint 2013.
- C. Execute queries against text-based data on the Windows operating system.
- D. Add a new server to the SharePoint 2013 farm.

Answer: B

Explanation:

Explanation/Reference:

Explanation:

The Operations Manager Web Part allows you to host dashboards on your SharePoint site. Unlike the web console, these

dashboards are "look, but don't touch".

You can view info, but not navigate elsewhere or run tasks. This is really good for giving people outside of the operations team a look at some operations data.

You also don't need to add all the users of the dashboard to an Operations Manager Role. Instead you can add the groups you want to give access to the dashboard to SharePoint and have them all share a single Operations Manager account and connection.
