The emergence of C-SACP-2107 dumps torrent provides you with a very good chance to improve yourself, Different from general education training software, our C-SACP-2107 exam questions just need students to spend 20 to 30 hours practicing on the platform which provides simulation problems, can let them have the confidence to pass the C-SACP-2107 exam, so little time great convenience for some workers, how efficiency it is.

#### NEW QUESTION: 1

DTP is configured on a switch interface. Which of the following is a valid command to disable DTP on the interface?

- A. `no dtp enable`
- B. `no dtp stp enable`
- C. `vlan 1 no dtp stp enable`
- D. `no dtp stp`

**Answer: C**

Explanation:

Disabling Dynamic Trunking Protocol (DTP)

Cisco's Dynamic Trunking Protocol can facilitate the automatic creation of trunks between two switches. When two connected ports are configured in dynamic mode, and at least one of the ports is configured as desirable, the two switches will negotiate the formation of a trunk across the link. DTP isn't to be confused with VLAN Trunking Protocol (VTP), although the VTP domain does come into play.

DTP on the wire is pretty simple, essentially only advertising the VTP domain, the status of the interface, and it's DTP type. These packets are transmitted in the native (or access) VLAN
