Without voluminous content to remember, our CAU501 practice materials contain what you need to know and what the exam want to test, So our CAU501 real exam far transcend others in market.

NEW QUESTION: 1

A cloud architect is designing a private cloud for an

organization. The organization has no existing backup infrastructure. They want to offer consumers the ability to backup virtual machine instances using image-based backups. What should the cloud architect look for when selecting a backup application for this environment?

- A.** Backup application supports a cloud gateway for accessing the cloud-based virtual machines
- B.** Virtual machine hardware is on the backup application vendor's compatibility list
- C.** Backup application can be integrated with the selected CMP components
- D.** Hypervisor servers' hardware is on the backup application vendor's compatibility list

Answer: A

Explanation:

A cloud storage gateway provides basic protocol translation and simple connectivity to allow the incompatible technologies to communicate transparently. The gateway can make cloud storage appear to be a NAS filer, a block storage array, a backup target or even an extension of the application itself.

NEW QUESTION: 2

In an organization's testing environment, the IBM Security Access Manager V9.0 deployment professional is required to deploy the virtual appliance on Amazon EC2 with a single reverse proxy instance with a single network interface. How should the deployment professional configure the reverse proxy so that end-users can access the reverse proxy without specifying a non-standard port (other than 80 and 443)?

- A.** Configure appliance management port to listen on non-standard port and set reverse proxy port to listen on standard port using LMI
- B.** Use port forwarding to map non-standard port to a standard port on appliance using CLI
- C.** Use port forwarding to map non-standard port to a standard port on appliance using LMI
- D.** Configure appliance management port to listen on non-standard port and set reverse proxy port to listen on standard port using CLI

Answer: C

NEW QUESTION: 3

You have an Azure subscription.

You have 100 Azure virtual machines.

You need to quickly identify underutilized virtual machines that can have their changed to a less expensive offering.

Which Wade should you use?

- A. Advisor
- B. Metrics
- C. Customer insights
- D. Monitor

Answer: A

Explanation:
