During a scheduled evacuation training session the following events took place in this order:
1. Evacuation process began by triggering the building fire alarm.
2a. The meeting point leader arrived first at the designated meeting point and immediately began making note of who was and was not accounted for.
2b. Stairwell and door monitors made it to their designated position to leave behind a box of flashlights and prop the stairway doors open with a garbage can so employees can find exits and dispose of food and beverages.
2c. Special needs assistants performed their assigned responsibility to help employees out that require special assistance.
3. The safety warden communicated with the meeting point leader via walkie talkie to collect a list of missing personnel and communicated this information back to the searchers.
4. Searchers began checking each room and placing stick-it notes on the bottom of searched doors to designate which areas were cleared.
5. All special need assistants and their designated wards exited the building.
6. Searchers complete their assigned search pattern and exit with the Stairwell/door monitors.

NEW QUESTION: 3
What is needed for the successful synchronization between NTP servers with enabled authentication?
A. NTP Trusted Key
B. Stratum hash
C. TLS certification (NTP certificates)
D. Something else
Answer: A
Explanation:
You can configure the Cisco CG-OS router to authenticate the time sources to which the local clock synchronizes. When you enable NTP authentication, the Cisco CG-OS router synchronizes to a time source only if the source carries one of the authentication keys specified by the ntp trusted-key command. The Cisco CG-OS router drops any packets that fail the authentication check and prevents them from updating the local clock.
