A. ã•¯ã•„
B. ã•„ã•„ã•^
Answer: B
Explanation:
Explanation
This solution meets the following goals:
* Users must be able to authenticate during business hours only.
* Authentication requests must be processed successfully if a single server fails.
* When the password for an on-premises user account expires, the new password must be enforced the next time the user signs in.
However, the following goal is not met:
* Users who connect to Office 365 services from domain-joined devices that are connected to the internal network must be signed in automatically.
You would need to configure Single-sign on (SSO) to meet the last requirement.

NEW QUESTION: 2
Digital evidence must:
A. Be Volatile
B. Be Authentic, complete and reliable
C. Not prove the attackers actions
D. Cast doubt on the authenticity and veracity of the evidence
Answer: B

NEW QUESTION: 3
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while

others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
You need to configure a Microsoft SQL Server instance to ensure that a user named Mail1 can send mail by using Database Mail.
Solution: You add the DatabaseMailUserRole to Mail1 in the tempdb database.
Does the solution meet the goal?
A. No
B. Yes
Answer: A
Explanation:
Database Mail is guarded by the database role DatabaseMailUserRole in the msdb database, not the tempdb database, in order to prevent anyone from sending arbitrary emails. Database users or roles must be created in the msdb database and must also be a member of DatabaseMailUserRole in order to send emails with the exception of sysadmin who has all privileges.
Note: Database Mail was first introduced as a new feature in SQLServer 2005 and replaces the SQL Mail feature found in previous versions.
