NEW QUESTION: 1

Ben attempts to send Jerry a Notes mail message. Both users are on the same mail server. Which of the following paths will the message take?

A. The Router will receive the message from Ben and drop it into the mail.box on the server where the next thread will pick

it up via NRPC and delivery it to Jerry.

B. Since Ben and Jerry share a mail server, the Router task isn't used at all; the server drops the message directly from Ben's client into Jerry's mailbox.

C. The Router will receive the message from Ben and deliver it immediately to Jerry's mailfile via SMTP

D. The Router will receive the message from Ben and deliver it immediately to Jerry's mailfile via NRPC

Answer: D

NEW QUESTION: 2

Refer to the exhibit,

which command do you enter so that R1 advertises the loopback0 interface to the BGP peers?

E. network 172.16.1.33 mask 255.255.255.224

F. network 172.16.1.32 255.255.255.224

Answer: B

NEW QUESTION: 3

You are a professional level SQL Server 2005 database administrator in an international corporation named Wiikigo. You are experienced in implementing high-availability solutions, monitoring the database server, and design deployment. In the company, your major job is the deployment, maintenance and support of Microsoft SQL Server 2005. You work as the database administrator for your company. A new stored procedure is created by you. You find an error when running the stored procedure. The company asks you to collect and process any error information that is generated while running the procedure. Error logging must use the least possible resources while providing the needed functionality. You have to find out what caused the error. The appropriate error functions need to be included in the new stored procedure. What action should you perform?

A. The @@error function should be used.

B. TRY...CATCH blocks should be used.

C. The XACT_ABORT command should be set to off.

D. A GOTO statement should be used.

Answer: B
