NEW QUESTION: 1

An organization has isolated environments for development, functional, integration and performance testing. Each environment includes at least one DataPower appliance, client, and several instances of backend systems. A solution implementer has made changes to a DataPower service in the development environment that needs to be promoted to other testenvironments for further testing. During migration, environment specific values must be changed in order for the configuration to integrate with the correct backend systems in the target environment. What options does the solution implementer have to automate this migration? (choose three)

- A.** Use the Deployment Policy object to changeenvironment specific values at the time of export at the source appliance.
- B.** Use the Deployment Policy object to change environment specific values at the time of import at the target appliance.
- C.** Use the WebGUI to change environment specific values and then export the configuration.
- D.** Use an external script to search and replace environment values. Then use the script to push the configuration via CLI or XML Management Interface.
- E.** Use the checkpoint function of the appliance to save copies

of configuration for specific target environments.

F. Take a secure backup of the appliance and secure restore the configuration on the target appliance.

Answer: A,B,D

NEW QUESTION: 2

SMTP headers in an email will contain the original host address even if that address is a reserved address space and therefore can reveal internal information of a network layout.

A. True

B. False

Answer: A

NEW QUESTION: 3

Answer:

Explanation:

Explanation

Box 1: add a subnet

Your IaaS virtual machines (VMs) and PaaS role instances in a virtual network automatically receive a private IP address from a range that you specify, based on the subnet they are connected to. We need to add the 192.168.1.0/24 subnet.

Box 2: add a network interface

The 10.2.1.0/24 network exists. We need to add a network interface.
