Take your CTAL-TTA\_Syll2012 valid training questions with ease, Firstly of all, the ISTQB Certified Tester Advanced Level - Technical Test Analyst (Syllabus 2012 - worldwide except D - A - CH - GB) test vce will be carefully checked and added into the latest information.

So do not hesitate and buy our CTAL-TTA\_Syll2012 preparation exam, you will benefit a lot from our products.

#### **NEW QUESTION: 1**

HOTSPOT

You are developing an ASP.NET MVC application that will be hosted on Microsoft Azure. The application includes the

StackExchange.Redis client package. A variable named CacheConnectionConfiguration stores the cache endpoint URL and the password to connect to the cache. The application must store a user's color selection by using the Azure Redis cache. The cached value must expire after 90 minutes. You need to cache the user's color selection. How should you complete the relevant code? To answer, choose the appropriate code segment from each list in the answer area.  
Hot Area:

**Answer:**

Explanation:

Explanation/Reference:

Explanation:

Box 1: `var cache = connection.GetDatabase();`

Once the connection is established, return a reference to the redis cache database by calling the `ConnectionMultiplexer.GetDatabase` method.

Box 2: `cache.SetString("color", colorSelection, TimeSpan.FromMinutes(90));` The `TimeSpanFromMinutes` method returns a `TimeSpan` that represents a specified number of minutes, where the specification is accurate to the nearest millisecond.

Example: The following code snippet shows how to set an expiration time of 90 minutes on a key.

```
// Add a key with an expiration time of 90minutes
await cache.SetStringAsync("data:key1", 99,
TimeSpan.FromMinutes(90));
```
