#### **NEW QUESTION: 1**

An administrator has noticed that virtual machine VM2 in the vApp shown in the Exhibit is demonstrating poor performance.

Which three changes, if performed separately, would improve the performance of VM2? (Choose three.)

- A. Remove the CPU limit on the resource pool.
- B. Increase the CPU reservation on virtual machine VM2.
- C. Remove the CPU limit on the vApp.
- D. Increase the CPU reservation on virtual machine VM1.
- E. Power off virtual machine VM1.

**Answer: B,C,E**

**NEW QUESTION: 2**

An Administrator is notified that a computer is no longer in service. The Administrator must update the IBM BigFix Inventory so the computer's software is no longer counted in the license calculations.

Which action should the Administrator take to accomplish this goal?

- A.** In the BigFix Inventory All Metrics, filter for the retired Computer, and use the Recalculate command
- B.** In the BigFix Console, select the retired Computer, and use the Tools > Delete Computer command
- C.** In the BigFix Software Classification report, filter for the retired Computer, and use the Exclude command
- D.** In the BigFix Console, select the retired Computer, and use the Edit > Remove command

**Answer: C**

Explanation:

Section: (none)

**NEW QUESTION: 3**

The "SetInfo" data transform is called by the "UpdateInfo" flow action, which is called by the "MainFlow" flow. Each rule is defined in the classes below:

MyCo-HR-SelfService-Work-TimeOff is the class of the work object. An architect wishes to specialize "SetInfo", and so he does a SaveAs into MyCo-HR-SelfService-Work-TimeOff. Will the new specialized rule be called when MainFlow is run? If so, can the original "SetInfo" rule be deleted? (Assume that UpdateInfo is the only rule that references SetInfo.) (Choose One)

- A.** The specialized SetInfo rule will be called. However, the original rule should be retained to prevent design-time validation errors.
- B.** The specialized SetInfo rule will not be called. UpdateInfo is in the more general class and therefore cannot call a rule in a more specific class.
- C.** The specialized SetInfo rule will be called, and the original can be deleted.
- D.** The specialized SetInfo rule will not be called. When two of the same rules are in an inheritance path, the rule in the more general class will be called.

**Answer: A**
