**NEW QUESTION: 4**

Which four statements are true about the Oracle Applications Manner (OAM) Setup global links? (Choose (four.)

- A.** The Concurrent Requests link enables setting up of alert for long running requests or pending requests.
- B.** The Knowledge Base link defines the credentials for accessing Oracle MetaLink.
- C.** The Concurrent Requests link helps enable and set up the frequency and thresholds of metric collections for the Dashboard.
- D.** The Business Flows link enables updation of seeded or custom business flows.
- E.** The Knowledge baselink enables retrieval of documents from Oracle MetaLink.
- F.** The Dashboard Setup link enables alerts for the status of services.

**Answer: A,D,E,F**

Explanation:

A: The Dashboard Setup page displays a summary of data collection for metrics and services. For each metric, you can see whether collection is enabled and whether you have alerting enabled for the metric. If alerting is enabled, you see the condition which must be met for an alert to be raised. To update the setup for the data collection, use the Dashboard Setup Wizard.

B: The Knowledge Base provides a catalog of useful documents relevant to managing your system.

C: Business Flows Setup: Enable or disable monitoring of business flows.

Click the Metrics Refresh link to schedule requests for the OAM: KBF Metrics Rollup Program to update the setup status of your business flows

E: From the Concurrent Requests page you can enable alerting for concurrent requests that have been running or pending for a long time. You can specify the thresholds for which request must reach before alerts are raised.

Specifically, you can enable the system to do the following:

\*Raise a general alert for any long-running requests, for any concurrent program.

\*Raise an alert for a long-running request for a specific program. Specify the concurrent program(s) you want to monitor.

\*Raise a general alert for any long-pending requests, for any concurrent program.

\*Raise an alert for a long-pending request for a specific program. Specify the concurrent program(s) you want to monitor.
